Discounted COVID testing for Lufthansa Group passengers

With South Africa being classified a COVID variant area, it is mandatory for all travelers departing South Africa to present a negative COVID-19 test result at the time of boarding their flight. In order to ensure our passengers obtain their necessary COVID test results on time, before their scheduled departure flight, the Lufthansa Group has partnered with **Atter Pathology Services (APS) in South Africa.**

APS provides fast and secure pre-flight COVID testing and ensure that all test results will be valid upon time of entry in Europe. Through a paperless and contactless online booking & payment system, APS have reduced customer waiting times and social contact risks. APS and Lufthansa Group work closely together to help customers plan their testing requirements. Lufthansa Group passengers are guaranteed their test results in time for their departing flight, provided that bookings are made and paid for on time, and all necessary steps are followed.

Information on how to book your COVID test through APS's simplified booking process is available [here](#).

As APS plans to relaunch their Johannesburg testing site on 1 June, the first 500 Lufthansa Group customers who book for this site via the website will receive a **10% discount** off the regular COVID testing price of R850* — thus bringing the cost of the test to just **R765* per person**. This offer is exclusively for Lufthansa Group airlines passengers booking in Johannesburg. To make use of this special limited discount offer, please use the discount code: **LHGAPS** prior to payment whilst booking on the APS [website](#).

Furthermore, should your Lufthansa Group flight be cancelled in advance, your pre-booked APS COVID test date can be rescheduled at no additional cost. In such instance, customers need only to send a WhatsApp message to **+27 74 438 5073**, or email bookings@atter.co.za with their new flight details in order to reschedule their test for the next suitable date & time.

APS have testing locations in both Johannesburg and Cape Town. Further details and information about Atter Pathology Services and COVID testing can be found at: www.atter.co.za.

Follow their Facebook page: <https://www.facebook.com/Atterpathology> for regular updates.

*cost refers to a PCR COVID test
