

H1 and X1

Two codes for additional flight content

With H1-Air and X1-Air you can book flights of airlines with limited or no GDS presence under the codes H1 and X1. By simply following the standard GDS and ticketing process, you will gain access to additional carriers that are available for ticketing on the insolvency-safe HR-169 document.

For even more ticketing choices: H1 and X1

Find 100 airlines that are typically not in your GDS under the codes H1 and X1. That's thousands of additional routes, hundreds of thousands of flights, and countless happy customers.

→ Just choose Hahnair (HR) as the validating carrier.

How to book and issue H1 and X1

1.

Quick Check
on www.hahnair.com

- Choose the ticketing country
- Enter carrier > **Status: YES**

2.

Select & book H1/X1 partners under the carrier code H1 or X1 in your GDS

3.

Enter passenger details

4.

Autoprice the ticket

5.

Select the form of payment (FOP)

6.

Issue the flight on HR-169 ticket stock

→ More than 100,000 travel agents in 190 markets already trust in our ticketing solutions.
