

Freight News Features are produced on a weekly basis, with each edition being distributed and promoted online throughout the week. At the end of each month, these features are compiled into a comprehensive Compendium, which is printed and distributed to key import and export decision-makers.

In addition, copies are strategically distributed at major airports including Lanseria, OR Tambo, King Shaka, and Cape Town International. The Compendium is also circulated to our extensive database and promoted to a targeted audience on Facebook.
